**Prevention is the key to better health**

Thanks to advances in veterinary medicine, pets are living longer, healthier lives than ever before. Preventive care can improve your senior dog’s quality of life and help you enjoy more healthy years together.

**Disease can creep up quickly and quietly**

Aging means more than just gray muzzles and longer naps—illness and disease could be lurking undetected in your senior dog. Physical exams and diagnostic tests are crucial for finding problems not visible to the naked eye.
